I'm trying to use a rails object to be used by the javascript on a rails project. class @state def current\_state "current" end def history @history.map do |c| c.current\_state end end end In the js, I try var prev\_state = ; But it doesn't work. I can't find any good tutorials on how to use the instance variables in js. A: Currently you are creating local variable called prev\_state in your JS. What you want to do is to pass the state variable created in your controller to js. In your controller, prev\_state = @state.current\_state You can access this prev\_state in your js. A coalition of government authorities including the Danish and Norwegian authorities have started the process of collecting electronic sales records that will be used in preparation for a \$10 billion volume and trading account (in cryptocurrencies) in the first half of the year. Kasper Støhl, head of the payments and cash management division at Danish Finance Minister Kim Christiansen said: "This initiative will open up a new and exciting market for the Danish and Norwegian economy. We must be the first to use the technologies and progress. We should use it in the interest of our citizens. I see it as an opportunity to push
