AutoCAD and AutoCAD LT have the capability of generating 3D drawings, as well as 2D drawings. CAD programs such as these were developed for the purpose of promoting two-dimensional drawing, and they are only designed to be used in the 2D realm. Typical uses for 2D CAD programs are for drafting and design tasks for objects made from 2D sheets or other flat surfaces. Common objects that can be created with 2D CAD programs include lines, arcs, circles, rectangles, squares, triangles, ellipses, splines, and polygons. Objects can be filled, connected, and textured.
