The highly anticipated fantasy action RPG game "Elden Ring" developed by LAYUS is released, and available worldwide on Steam on November 14th. *Contents are subject to change. ABOUT LAYUS The indie studio LAYUS has produced a wide range of popular games and has become known for the development of "Vainglory" and "KING's Field." LAYUS has been developing "Elden Ring" since 2014 with the goal of creating a fantasy action RPG game that pulls you into a myth with a strong visual style. The game is currently in its early development stage, and after a few months of development, we are excited to announce its release. ABOUT INORDER *Contents are subject to change. ABOUT HALEGG STUDIOS Halegg Studios is a Danish game studio with more than 20 years of experience. They are the creators of the RPG "Tales of Berseria" and the action game "The Repopulation." In order to optimize the game's development, the studio has teamed up with LAYUS. "Tales of Berseria" and "The Repopulation" have been praised for their quality, and have been very popular worldwide, giving rise to expectations of Elden Ring's release. In order to meet those expectations, we ask for your patience and understanding. ABOUT THE PUBLISHER: Since March 2015, Arkane Studios has been supporting the creation of a new fantasy action RPG game. Version 1.9 Release Candidate on Steam New Duel System Based on Performances and Skill Ratings - The Duel Mode that was implemented at the end of 2016 is updated and improves the Duel System. Players will be able to see how strong a teammate is in the Duel System. If they lose, they will understand why they lost. Players can check their current Skill Rating by pressing ESC in the Duel. - The Duel System can be switched to a Solo Mode by pressing ESC during the Duel Mode - Besides, we have modified and improved the Duel Mode. Please share your feedback, and let us know if we can improve. New Features and Improvements - Players can check their skill ratings in real time with a button press - HP has been introduced for skills that don't heal the HP of a unit, such as the Improved Recovery

Elden Ring Features Key:

Elden Lord system (mechanics, rules, etc) (They are all optional, but having this feature significantly influences the game's story, gameplay, etc.)
Easy to pick up and play (play through the story in a couple of hours)
The Lands Between, the epic story between the game's characters
Boss Raid War (optional boss raids that can be engaged when the event is in an active status)
Boss Raid Gear (rare gear obtained by defeating a boss)
Fight in a massive map: the leveled statistical records of the game are kept in this massive map
Customizable characters (Equip weapons, armor, magic, etc that complement your play style)
Delve deeply into the story through advanced quests like If This is the World's Reward..., Descend Into the Dark Divine, A Maiden's Coronation, or Legends of Ishitaria
Optimized strategic gameplay that can be enjoyed by both players with various levels of experience

Release Date and Updates

- November 12, 2015: Final Product Released!
- January 12, 2016: Final Product Release Update!
- March 19, 2016: Final Product Release Update #2!
- April 9, 2016: Content Update #3!
- May 1, 2016: Content Update #4!

Release Sale Period and Opening of the Pre-Distribution Phase

- July 1, 2016: Final Product Release Sale Period!
- July 15, 2016: Opening of the Pre-Distribution Phase: Distribution for all pre-order customers
- July 25, 2016: Opening of the Pre-Distribution Phase: Distribution for all pre-order customers
- July 30, 2016: Phase 1 Pre-Order Sale Period: General sales for all pre-order customers

Pre-Distribution Phase

We apologize for any inconvenience.* The update will be installed after all players have completed the previous payment.* In order to play the updated content, please log in to the client before the update is installed. Formation of biohybrid materials of polyhedral oligomeric silsesquioxanes-bioglass composite in association with stereodeficiency of bioactive glass. The aim of this work is to prepare and characterize biohybrid materials by combining a 3D bioglass with polyhedral oligomeric silsesquioxanes (POSS) as a structure-directing agent in an attempt to obtain hybrid materials with enhanced material properties. Biohybrid materials were prepared by assembling POSS onto bioactive glass (BG) particles in the presence of an organic template, namely, calix[4]arene. SEM micrographs showed the formation of polyhedral oligomeric silsesquioxanes (POSS) particles associated with BG particles. The addition of POSS was confirmed by elemental analysis. The biohybrid composites showed a crystalline structure and high surface area. XRD spectra revealed the crystallization of bioactive glass; however, the presence of silanol groups was found on the surface of bioactive glass after being treated with octadecyl amine. X-ray photoelectron spectroscopy (XPS) analysis showed the presence of Si-O-Si in bioactive glass particles and Si-C and Si-N in POSS-modified bioactive glass after the alkaline treatment. The presence of Si-O-Si, Si-C, and Si-N groups on the surface of bioactive glass was also confirmed by Fourier-transform infrared (FT-IR) spectroscopy. The biospecificity of the biohybrid material was confirmed by the highly negative charge of C=O and negative charge of C-N groups.EAST LANSING, Mich. (AP) -- Jake Butt is giving

What's new in Elden Ring:

Sun, 08 May 2018 07:00:02 +0930Play in an MMO with a Story, Fusing Both Simulation and Roleplaying Features >**PERSONALIZED, PLAYABLE WORLD: IBANG MOKBANG MOBILE is the first global mobile massively multi-player online (MMO) social game in Asia.**

With millions of active users around the world, IBANG MOKBANG MOBILE is one of the leading games in the country. The game features Personalized: You can have different houses depending on your characters playing styles. Characters are also customizable in visual appearance, equipment, and stats. Where you are in your country can be uniquely displayed on your Facebook timeline, in-game messages and updates. The game is geared towards gamers who have time to enjoy the game and not necessarily a few hours of gaming a day. Players who aren't logging in into a game will receive rewards for activity. As you interact with your in-game friends, the value of your goods are increased by regarding the player whose values is more valuable.

Furthermore, IBANG MOKBANG MOBILE can seamlessly connect users, regardless of Internet access. User data can be transmitted and retrieved rapidly, which enables delivery of services tailored to the users' unique situations.
