Hotelmanagement Crack Download Latest

Hotelmanagement Activation Code - is a software application designed to assist you in hotel business management in an easy manner. The program provides you with a huge selection of useful features, such as view a booking scheme, generate invoices, add rooms to a list of available rooms, add photos and more. The program has a friendly interface and is very easy to use. It can be installed on a PC and requires no additional technical support. Hotelmanagement Features: Viewing Lists: You can view a list of bookings available at any given time, so that you can find out when a room will be available. This list is sorted chronologically, so you can easily view the list by choosing the date range you are interested in. You can click on a date to view details for that particular day. In addition, you can view the reservation range: for example, you can see what rooms are available for the reservation period starting on January 1, 2018 until December 31, 2018. Generating Invoices: With Hotelmanagement you can generate invoices, which are sent to the users who made the reservations. You can set up how the invoice is to be sent, by choosing the method that best suits you: print, pdf or email. Viewing Expenses: Hotelmanagement allows you to view the

expenses for a given month. You can choose to view the expenses as a list of items or in categories. The latter view will help you to keep track of the expenses for the given period. Generating Invoice PDFs: Another feature that you can use with the program is the ability to generate invoices as PDF files. This way, you can save the invoice on a removable device or send it with an email. Defining Rooms: Hotelmanagement offers you the option to enter a list of available rooms. You can check the number of rooms available and choose the ones you want. You can also specify when the room is available for bookings, or when it is available for long-term bookings. Adding Photos: The application provides you with an easy way to upload photos of available rooms, in order to give customers an impression of what their rooms will be like. Maintaining Rooms: You can manage the status of the rooms in your Hotel, by checking the status of the rooms and deleting them when you want. You can also schedule the rooms to be cleaned, so that you don't have to do it yourself. Checking

Hotelmanagement

Hotelmanagement is a simple but versatile hotel management solution that comes with impressive capabilities and a rich user interface. Its customizable user interface provides you with a simple yet comprehensive way to perform various tasks, such as managing reservations, room types, rates and availability. You can set up separate lists for different fees or propose different rates per room type. You can adjust every detail through the extensive configuration menu, and the application's reliable backup and restore functions also enable you to preserve your data in case you fear about data loss. You can view a booking scheme, which you can easily edit by clicking a date and typing the required information in the designated fields. Additionally, you can create entries for the rooms in your establishment, add photos, specify their location, change their status, choose the category they best fit in and define pricing details. Hotelmanagement can manage large amounts of information and has multiple useful functions. The application performs trustworthy backup and restore tasks and provides you with an extensive configuration menu. Features: • manage hotel reservations • manage availability, bookings, invoices and rooms • manage contacts • manage room types • manage room pricing • manage photos • manage reservations, room types, pricing and availability
