### **Youtube Video Audio Downloader Crack Activation Key**

Youtube Video Audio Downloader is a practical and reliable software solution whose main purpose is to help users download video and audio files from online streaming websites and store them into their system. The installation process is very easy, however you should pay attention to in order to dismiss any third-party software that might be included in it. The application comes with a simple interface that allows you to add the URL address in the corresponding box, then choose what you want to download, be it video or audio. When selecting the 'Download Video' option, you are provided with several output video formats to choose from such as.mp4,.webm and.flv, to name a few. You can easily navigate to the destination folder where to video will be saved, choose the output format, then download your favorite files. During the downloading process, we noticed that the application runs smoothly and does not cause the system to freeze, and neither does it impact other running software. Also, you are able to download only the audio part from the current file. Choose the proper option, select the destination folder and grab all your favorite audio files from the Internet. Still, a drawback of this option is that it allows you to download audio files only in.mp3 format. In case you want to transfer them to a mobile device that needs.wav or.mpg format, for example, you need to use other utilities that help you convert your files to the desired output formats. Another downside of the application is that it does not recognize the URL address automatically. You are required to paste it in the proper field or write it manually, then start the downloading process. Overall, Youtube Video Audio Downloader proves to be a steady solution that allows you to download your favorite video and audio files from the Internet, still, customizable options and more output formats would have made the application more practical and effective.
