invention relates to the field of eraser devices for erasing the surface of a sheet of paper or like material and more particularly to an eraser with a grip
that can be used in combination with the eraser to facilitate use. 2. Description of Related Art Various types of erasers have been developed over the
years for use with a variety of materials, such as paper, canvases, vinyl record materials, and the like. It is well known to use such erasers to remove
unwanted areas of an object, such as the surface of a sheet of paper or the like. It is common for such erasers to be constructed in a manner similar
to the construction of many other types of erasers. For example, such erasers include a structure having a pointed end such that when the pointed
end is applied to a surface of an object, an air space is formed between the pointed end and the c6a93da74d
