## Asus K52f Web Camera Driver Windows 8

If you want to scan for drivers on Windows 10, click Scan for additional drivers under Settings and find your driver. If you are using Windows 10, you should find and install the latest ASUS K52F Notebook driver at [AsusDriversDownload.com](http://AsusDriversDownload.com). When your camera isn't working in Windows 10, it might be missing drivers after a recent update. It's also possible that your antivirus program is blocking the camera, your privacy settings don't allow camera access for some apps, or there's a problem with the app you want to use. If you're having problems with an app that you did not install from Microsoft Store, make sure that Let desktop apps access your camera is turned on. You can't turn off camera access for individual desktop apps. Internet browsers, like Microsoft Edge, and many video conferencing apps, like Microsoft Teams, are desktop apps that require this setting to be turned on. The driver is compatible with most notebook models. In addition, you can also download the 64-bit version or the 32-bit version of the Asus K52f driver. In case you have any questions or queries, you can always visit [ASUS FAQ](#). You can also contact the driver support team on their chat or on live chat services. The video quality should be HD, but you can also use VGA or slow motion if you prefer. The picture resolution should be set at 1280x720 pixels, but you can set it to 1920x1080 if you want to increase the size of your monitor. The color depth should be set at 16 or 32 bit. If you want to change any of the settings on your camera, you can always use the manual option. For other problems that can occur with your camera, you can always contact the support team. They are available 24/7.
