download microchannels are a new technology
that has the potential to revolutionize the
design of heat exchangers. they are created in
layers, creating a 3d object, which is strong,
rigid, impact resistant and highly efficient.
unilab's philosophy has always been to
develop technology that can improve the
thermal performance of heat exchangers and
solve complex problems. the microchannel
technology in combination with the unique

unilab software makes this possible.
microchannels are invisible and hard to detect
and they can be used in a wide range of
applications, from refrigeration and air-
conditioning to automotive, maritime,
industrial and ... 5ec8ef588b
