Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

The iPad Pro with Photoshop CS6—a new creative tool inspired by renowned artists and designers and designed to provide a truly collaborative experience—offers up to 26 hours of battery life, a 12.9-inch display, and the fastest performance possible to make mobile apps run more fluidly. The iPad Pro is the most powerful and mobile creative powerhouse, the result of collaboration by the Photoshop creative team. Adobe announced today at its annual MAX conference at the Rose Theater in Hollywood, California its two software development teams, CS6 Creative Suite and the Creative Cloud, were collaborating on "Project Sumi," an iPad Pro prototype that brings together the power of the iPad Pro and the creativity of CS6 to provide powerful new mobile tools for the digital content creation process. Adobe Photoshop for iPad will launch later this year with access to Photoshop's full Creative Cloud library of tools for creative professionals, including the ability to download and install new plugins. The release of Photoshop for iPad marks the maturing of Adobe's mobile strategy, which has largely focused on tablets with large screens. Adobe's latest collaboration on Project Sumi is the result of a separate CS6 team--the Android team--working with the Photoshop team in continuing the development of Photoshop CS6 for Android in tandem with the release of Photoshop on iPad. >>>> In the last couple of years, Adobe has made two major bets on the future of the Creative Suite. The first was on the idea that the future of the Creative Suite will be powered by a device like the iPad. We think the second bet is even bigger. That bet is two years from now, when we'll be building a version of Photoshop on the iPad like we are on the Mac. >>>> "I'm excited about Photoshop on iPad," said Joe McEntee, Adobe's Senior Vice President of Creative Solutions. "It's one feature on CS6, but we saw a lot of people saying 'I'd love to be able to take my photos and my photos of my kids and finish the picture—and right in Photoshop!' We want to harness that power and use it on the iPad or at a trade show and be able to say, 'Oh yeah, I'm designing a trip around that, and I'm taking sketches to my model, I'm doing what I want to do on the iPad.'"
